EDGE G AV modular - expandable multichannel amplifier and G.5 amplifier

Edge is known for award winning two channel solid state amplifiers. The G AV amplifier represents a breakthrough in size verses power output. G AV and G.5 utilizes a "Powerwave", hybrid type switching power supply and output stage. "Powerwave" increases the efficiency of the amplifier while also reducing the operating temperature.

The G.5 is the most affordable Edge amp ever. With two channels each producing 100 watts of pure Edge sound into 8 ohms or 200 watts into 4 ohm, this new contender retails for under \$2500.

Standing just 6.5 inches wide and just under 8 inches tall, this new amplifier accepts balanced and single-ended inputs and sports a detachable power cord.

Possible configurations of the G AV amp

3 channel x 250 watt	3 channel x 500 watt
4 channel x 250 watt	4 channel x 500 watt
5 channel x 250 watt	5 channel x 500 watt
6 channel x 250 watt	6 channel x 500 watt
7 channel x 250 watt	7 channel x 500 watt
3 ch x 250 watt / 2 channel x 500 watt	
3 ch x 250 watt / 3 channel x 500 watt	
3 ch x 250 watt / 4 channel x 500 watt	
4 ch x 250 watt / 2 channel x 500 watt	
5 ch x 250 watt / 2 channel x 500 watt
